

## 1. Introduction:

Auxiliary for the leather industry.

## 2. Presentation:

Oily filler for pull-up effect. Emulsifiable in water.

## 3. Chemical-physical characteristics:

Appearance:	Liquid.
Active substance:	90 +/- 2%
Density:	0.960 - 0.970 grs./cm <sup>3</sup>
Color:	Semi-transparent.

## 4. Properties:

This product is an oil mixture which has natural and synthetic components and has been developed in order to obtain brightening pull-up finishes. It is emulsifiable in water. Is possible to use as an auxiliar in finishing recipes for touch modification.

## 5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

## 6. Usage:

It penetrates the skin well and provides it with an oily, greasy surface. It can be applied either on its own or diluted (more than once if required) with water. Once treated this way, the skin is normally left for 12 hours, after which it can be finished with specially waxy or greasing substances. The product should be shaken before use. Keep packs perfectly sealed.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
