

AC-0170

1. Introduction:

Auxiliary for the leather industry.

2. Presentation:

AC-0170 is a mixture of synthetic oils to obtain pull-up effects.

3. Chemical-physical characteristics:

Mixture of synthetic oils.

Appearance:	Viscous liquid.
Color:	Yellowish.
Odour:	Typical.
Solubility in water:	Immiscible.

4. Properties:

With AC-0170 we can obtain pronounced pull-up effects without impairing the fastness of the leather. AC-0170 penetrates well into the leather. The shade of the leather becomes darker when it is treated with oil and pull-up effects with a pronounced contrast can be obtained.

5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 12 months.

6. Usage:

The product can be applied by roll coating machine and the pull-up effect will depend on as the applied amount as the absorbtion capacity of the leather.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
