

1. Description:

Auxiliary product for leather finishing.

2. Presentation:

AC-0180 Oil is an auxiliary product purposed for leather's finishing. It provides a greasy touch to its surface, as well as a heavy darkening effect.

3. Composition:

Compound based on natural oils and modified fats.

Appearance:	Viscous liquid.
Colour:	Amberish.
Solubility:	Non miscible.
Active material:	99% +/-1.

4. Properties:

AC-0180 Oil is a viscous liquid, slightly turbid and yellowish and gets not mixed with water. AC-0180 Oil is soluble in different organical solvents, and it can be easily mixed with pull-up waxes. By using the AC-0180 Oil, finished leathers with a greasy touch of the surface are obtained. High darkening effect. The product also gives a water-repellent surface.

5. Minimum storage capacity:

The product can be stored in its well closed container in a well ventilated place at temperatures between +5° and +35°C. In its sealed container it lasts 12 months.

6. Application:

This product can be applied either straight to roll-coating or in combination with pull-up waxes or other oils.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
