

1. Description:

Auxiliary product for leather finishing.

2. Presentation:

AX-0215 Auxiliary Product is a fluorocarbon polymer in an organical solution. Oil and hydro-repelling.

3. Composition:

Fluorocarbon polymer in an organical solution.

Appearance:	Transparent liquid.
Flash point:	<21°C

4. Properties:

Special product in organical solution based on modified fluorocarbon resins. It provides the conveniently treated substract over which this product is applied with hydro and oil-repelling features.

5. Minimum storage capacity:

The product can be stored en its well closed container in a well ventilated place at temperatures between +5° and +35°C. In its sealed container it lasts 6 months.

6. Application:

Product must be shaken before its use. It normally is diluted in mixtures of organical solvents, such as ketones, esters and chlorinated solvents. Using solvents grants a better regulation of ulterior penetration. One of the main applications for this product is using it as a penetration regulator over the background layers, for nappalan finishings.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
