

1. Introduction:

Auxiliary for the leather industry.

2. Presentación:

Dyeing auxiliary for the leather finishing.

3. Chemical-physical characteristics:

The auxiliary for dyeing AX-0229 is a polymer solution in hydroalcoholic medium.

Appearance:	Liquid.
Charge:	Anionic.
Dry matters:	6 - 8%
pH sol. 1:10:	8,0 - 9,0
Color:	Amber.
VCO Content:	18 %

4. Properties:

The Auxiliary AX-0229 is a non-thermoplastic polymer which ensures an optimal penetration during the aqueous dyeing process that include metallic complex dyes. It is no necessary to add solvents. The Auxiliary AX-0229 provides in-depth coverage that improves flower defects by improving the junction between the layers of finishing process.

It can also be used to improve the bond between layers of resinic bottom when does not recommend a penetrating surfactant.

In the case of water repellent leather, penetrometer values are not altered.

5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +2°C to +30°C. Sealed containers have a service life of 12 months.

6. Usage:

An standard application could be of 700 parts of water, 300 parts of Auxiliary AX-0229 and 50 parts of Eukesolar dye. Although pigment can also be added if required (up to 50 gr./l.).

The product should be shaken before use.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
