

Helpa LES

1. Introduction:

Anionic emulsifier with greasing effect.

2. Description:

Emulsifier with greasing action.

3. Composition:

Appearance:	Liquid.
Character:	Anionic.
Dry content:	28% +/- 1

4. Properties:

Helpa LES is an emulsifier that is miscible with water in any proportion. Emulsifies and stabilizes anionic fatliquors and improves their ability to penetrate the skin. It also has a mild greasing action. Resistant to dry cleaning solvents and exhibits good light fastness and heat resistance.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

It can be used as a dyeing aid to improve dye penetration, as well as for wet-back on crust leathers. Especially recommended for washable leathers that must be resistant to dry cleaning.
