

AX-0231

1. Introduction:

Auxiliary for the leather industry.

2. Presentación:

Polyaziridine cross-linker.

3. Chemical-physical characteristics:

or or contract projection or	
Chemical nature:	Polyaziridine cross-linker.
Appearance:	Viscous clear liquid.
Solids content:	ca 70%
pH:	10,5+/-0,5

4. Properties:

The AX-0231 is an organic cross-linker with excellent features for all polymers emulsions, such as acrylic, polyurethane and buthadienic resins. It can be directly added to polymers blend from 3 to 6% on dry polymer weight.

5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 12 months

6. Usage:

Particular attention should be put during embossing and plating, in order to avoid adhesion problems. It has 12 hours pot-life, so further dosage is needed when mixtures stand longer than 12 hours.

7 Safety

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
