

## 1. Introduction:

Auxiliary for the leather industry.

## 2. Presentación:

CW-0402 is a wax and protein emulsion.

## 3. Chemical-physical characteristics:

Aqueous emulsion of wax.

Appearance:	Viscous liquid.
Character:	Anionic.
Dry matter:	20%
PH (1:10):	8,5
Color:	White.
VOC content:	0%.

## 4. Properties:

CW-0402 Wax is used as prebottom and significantly improves the closure and the uniformity of the flower worn during the ironing operation. Gives a fine grain and covers regularly and totally defects maintaining the natural character of the skin. The amount to use between 100 and 200 gr./l. mixed with resins and casein.

## 5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 12 months.

## 6. Usage:

The product should be shaken before use.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
