

## 1. Introduction:

CW-SGM wax is an aqueous emulsion of waxes.

## 2. Description:

Aqueous emulsion of waxes.

## 3. Composition:

Appearance:	Liquid.
Character:	Anionic.
Solid content:	20.5%±1
pH value (1:10):	8.0±0.5
Colour:	Ivory.

## 4. Properties:

CW-SGM wax is a special wax that provides great filling and leveling power. Once applied, it gives the skin a matte appearance with a waxy feel. It is a polishable wax and improves shine when ironing.

## 5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

## 6. Application:

It is applied on crust leather, alone or mixed with pigments and/or anilines. It can also be used together with binders that are usually used in leather finishing. When the wax is used alone, once applied it can be washed out for aged effects.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
