

Decalqin R

1. Description:

Auxiliary product for hide deliming.

2. Presentation:

Fast and deep action deliming products mixture.

3. Composition:

Polyethylene wax water emulsion.

Appearance:	Powder.
Nature:	Anionic.
pH value (1:10):	1,5 approx.
Colour:	White.

4. Properties:

Especially suitable for fast processes thanks to its great ability to extract lime out of the hide. It penetrates fast and is especially suitable for deliming over non split hides and by using short time baths.

5. Minimum storage capacity:

The product can be stored in its well closed container, in a well ventilated place at temperatures between +5° and +35°C. In its sealed container it lasts 12 months.

6. Application:

Its use does not cause unwanted swellings, resulting in smooth, soft and closed, fine pored hides.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
