

# Qinoil 795

## 1. Introduction:

Emulsified lecithin-based fatliquor.

## 2. Description:

Emulsified lecithin-based fatliquor.

## 3. Composition:

Appearance:	Liquid.
Colour:	Dark brown.
Active matter:	95.0%±3%
pH:	7.0±1.0
Character:	Slightly anionic.
Iodine Index:	56 approx.

## 4. Properties:

It has very good penetration into the leather. Hides and leathers oiled with Qinoil 795 show excellent softness with a silky feel and a fine, spongy grain. It gives light weight and tear resistance if we use it in the chrome leather neutralization bath. Good light fastness and recommended for leathers intended for automotive upholstery due to its low values in the fogging test.

## 5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

## 6. Application:

The product can be applied undiluted but if it is used with other anionic fatliquors, the dilution must be done with water at 60°C in a ratio of 1:3 to 1:5.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
