

Qinoil PGS

1. Description:

Auxiliary product for leather fatliquoring.

2. Presentation:

Qinoil PGS is a polymer based fatliquoring agent purposed for all kinds of leathers to be milled.

3. Composition:

Fatliquoring polymer.

Appearance:	Pasty liquid.
Solids content:	37 +/-1
pH value (1:10):	7,0 +/-1
Colour:	Beige.

4. Properties:

Suitable for all kinds of soft leathers, such as clothing, upholstery, milled nappas and "double face".

5. Minimum storage capacity:

The product can be stored in its well closed container in a well ventilated place at temperatures between +5° and +35°C. In its sealed container it lasts 12 months.

6. Application:

It can be used for white and pastel coloured leathers. It features an excellent light and heat fastness. It provides lightness to leather, by decreasing the tautness between the fibres.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
