

Qinoil S2G

1. Description:

Product for leather stuffing.

2. Presentation:

Stuffing agent for all kinds of items

3. Composition:

Natural and synthetic sulphited oils mix.

Appearance:	Liquid.
Nature:	Anionic.
Solids content:	60% approx.
PH value (1:10):	7,0 ±1
Colour:	Yellowish.

4. Properties:

Multi purpose stuffing agent that can be applied for all kinds of items, even for soft and light fast items. It can be used at the rechroming previous to the leather's neutralisation procedure, at the self neutralisation, at a retanning procedure and, of course, at the main fatliquoring procedure. It provides fullness and a round touch.

5. Minimum storage capacity:

The product can be kept well closed inside its own container, in a well ventilated place at a temperature moving between +5°C and +35°C. It lasts for 12 months kept in its own sealed container.

6. Application:

It can be used, in the case of leather for shoe making, as a main fatliquoring agent or as a part of a stuffing products mix. Quantities to be added will always depend on the item's final features.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
