

# Qinoil S2H

## 1. Introduction:

Oil for greasing chrome or chrome-free leather.

## 2. Description:

Sulfited and deodorized fish oil.

## 3. Composition:

Appearance:	Liquid.
Character:	Anionic.
Solid content:	65%
pH value (1:10):	7.0±1
Colour:	Amber.

## 4. Properties:

It gives quite considerable softness. Small amounts of the product considerably improve the touch of the skin. It has better resistance to UV light and heat than most fish oils. It produces fairly low FOG and VOC values.

## 5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

## 6. Application:

It can be used both in rechroming, neutralizing and retanning, in addition, obviously, to be used in the main fatliquoring, either in combination with other fatliquoring agents, or as a unique fatliquoring agent for automotive upholstery leather.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
