

Qinoil S5AK

1. Description:

Product for leather stuffing.

2. Presentation:

Natural sulfationed oil.

3. Composition:

Natural sulfationed oil.

Appearance:	Liquid.
Nature:	Anionic.
Active substance:	75%.
pH value (1:10):	6,5-7,0
Colour:	Reddish brown.

4. Properties:

It provides a great fullness and firm grain to leather. Mainly suitable for leather destined to leathergoods and shoemaking. Using this product the leather shows a medium softness, if it was not combined with other stuffing agents. It gives to the final leather a particular waxy touch. It must not be used neither as an only nor as a main stuffing agent within a stuffing combination, unless it was applied over weak structured skins.

5. Minimum storage capacity:

The product can be stored in its well closed container, in a well ventilated place at temperatures between +5° and +35°C. In its sealed container it lasts 12 months.

6. Application:

It uses to be applied in quantities behold between 2% and 4%, over shaved weight and, if possible, at a new bath rather than in combination with retanning or dyeing agents.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
