

# Qinoil S5F

## 1. Description:

Product for leather fatliquoring.

## 2. Presentation:

Sulphationed stuffing oil.

## 3. Composition:

Appearance:	Liquid.
Nature:	Anionic.
Active material:	60% $\pm$ 1
pH value (1:10):	6,0 – 6,5
Colour:	Amberish brown.

## 4. Properties:

Even though this product is a sulphationed agent, it features a good and even penetration, providing firm and soft leathers. It gives a warm touch, even on the inner side of the leather. It keeps colours' brightness. It features a medium stability and it is sensitive to hard waters, electrolytes and non fixed retanning or colouring agents. It can be used for white and light fast items.

## 5. Minimum storage suitability:

The product can be kept well closed inside its own container, in a well ventilated place at a temperature moving between +5°C and +35°C. It lasts for 12 months kept in its own sealed container.

## 6. Application:

It has to be used in combination with other fatliquoring agents. We recommend using quantities between 30% and 50% of the total stuffing to be used.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
