

Qinoil SCR

1. Description:

Product for leathers' fat liquoring.

2. Presentation:

Fat liquoring product purposed to obtain soft items.

3. Composition:

Oxidized sulphited oil.

Appearance:	Liquid.
Nature:	Anionic.
Active material:	60%±1
pH value (1:10):	7,0±1
Colour:	Reddish brown.

4. Properties:

This product provides an excellent softness to leathers, even when added in small quantities. It also gives a good fullness to leather, as a round and pleasant touch is obtained.

5. Minimum storage suitability:

The product can be kept well closed inside its own container, in a well ventilated place at a temperature moving between +5°C and +35°C. It lasts for 12 months kept in its own sealed container.

6. Application:

Although it can be used as an only fatliquoring agent, especially for upholstery leather, usually it is added as a part of the combination of several ones. It can be used in the main fatliquoring process, or during chrome tanning, neutralizing or retanning procedures.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
