

1. Introduction:

LC-0714 New is an aqueous nitrocellulose emulsion.

2. Description:

Nitrocellulose emulsion in aqueous phase.

3. Composition:

Appearance: Fluid emulsion.

Solid content: 11%

pH value (1:10): 8.5

Colour: White.

4. Properties:

Lacquer LC-0714 New is a nitrocellulose emulsion specially formulated to be used as an intermediate coat or as a final lacquer in full grain, corrected grain or plasticized split leather. Provides a high shine with a natural feel. It has high resistance to dry and wet rubbing.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

In final layers for full grain, corrected grain and plastic split leathers; both for footwear and leather goods. Depending on the desired requirements in terms of fastness to rubbing, it can be diluted with water 1:1, 1:0.5 and even 1:2.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
