

Helpa CR6

1. Description:

Protector to prevent the formation of Chromium VI.

2. Description:

Mixture of organic compounds with reducing activity.

3. Composition:

Appearance:	Liquid.
Colour:	Bluish.
Character:	Anionic.
pH (10%):	7.0 approx.

4. Properties:

The product is resistant to electrolytes in common processes and concentrations. As it is an emulsion, it is subject to small variations in color and consistency. These small variations will not influence the application or its technical properties. Its application reduces the risk of formation of chromium VI in a lasting way. Penetrates evenly and deeply into the skin.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

It will be applied together with the main greasing package whose mixture will be emulsified and diluted as usual. The amounts to be applied will be around 0.5% to 0.8% on the weight of the shaved leather. Shake well before use.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
