

Tanqin CRE

1. Description:

Auxiliary product for leather industry.

2. Chemical nature:

Product based on synthetic retanning agent and chrome salt.

3. Composition:

Appearance:	Green powder.
Cr2O3 content:	Approx 12%
pH value (1:10):	2,0 – 3,0
Concentration:	94-96%

4. Properties:

Tanqin CRE is a chromed synthetic product which provides soft and full touch, while it gives a high grain finesse and equalizes dye without making it clear.

5. Minimum storage ability:

The product can be stored inside its well closed container, in a ventilated room an under temperatures between +2°C and +40°C. It lasts 12 months in its sealed container.

6. Application:

Tanqin CRE is used as a tanning or retanning agent in the production of items that require soft touch, grain finesse and light fastness. It also increases tearing resistance.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
