

# Tanqin CRN

## 1. Description:

Buffering mix, containing chrome.

## 2. Chemical nature:

Soft tanning condensation products.

## 3. Characteristic features:

Appearance:	Powder
Color:	Greenish
pH:	5,0
Cr2O3 %:	13,0
Concentration %:	90,0

## 4. Properties:

Tanqin CRN gives fullness to the leather and it remarkably improves the touch. It bleaches scarcely the dyes and maintains chrome leather's character.

## 5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +2°C to +35°C. Sealed containers have a service life of 12 months.

## 6. Application:

Tanqin CRN is used for the retanning of chrome leathers when there is a special interest on dye's intensity and equal matching as well as on fiber's softness and fineness.

The best way for retanning upper leather and upholstery leather is adding from 3% to 6% on the shaved weight.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
