

Tanqin VDC

1. Description:

Retanning agent to increase leather's fullness.

2. Chemical nature:

Recipe of compounds including dicyandiamide resins.

3. Characteristical features:

Appearance:	Powder
Colour:	Yellowish
PH:	8,0 - 9,5
Solids:	>85
Charge:	Anionic

4. Properties:

Tanqin VDC is a retanning agent that increases chrome leather's fullness, especially in the most empty areas, such as a belly, without damaging leather's chrome character. Using this product, we will obtain fine grain leathers as well as round touch leathers, also being increased its suitability to be polished and engraved.

5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +2°C to +35°C. Sealed containers have a service life of 12 months.

6. Application:

As commented, the product has to be applied after neutralization, either alone or in combination with other retanning agents, in quantities between 6% and 9% in the first case, and between 2% and 5% in the second.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
