

# Tanqin C2

## 1. Introduction:

Product for leather retanning.

## 2. Description:

Product based on the combination of condensation products, natural tanines and organical additives.

## 3. Composition:

Appearance:	Powder.
Nature:	Anonic.
Solids content:	93% approx.
pH value (1:10):	3,5±0,5
Colour:	Beige.

## 4. Properties:

Good solubility and low astringency featuring product, which makes it suitable for retanning procedures of chrome leather. It provides the leather with full touch and firm grain, highly suitable for being buffed.

## 5. Minimum storage capacity:

Product can be stored in its well closed container, in a well ventilated place and at temperatures between +5°C and +35°C. In its well closed container, it lasts for 12 months.

## 6. Application:

Before retanning by using Tanqin C2, wet blued leathers do not have to be deacidified, or only slightly. For chrome tanned leathers, coming out of the tanning, showing pH level >4,0, a simple wipe will be enough. When pH level is lower, we advice deacidifying up to 4,5. This working method, in addition to its already detailed advantageous features for leather, performs an even and soft deacidifying that makes notably easy the absorption of some vegetable tanning agents added later, and the absorption of the fatliquoring agent itself.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
