

Tanqin VTR

1. Description:

Retanning agent with big firmness and filling capability and a good tube effect.

2. Chemical nature:

Combination product containing pyrogallic derivatives.

3. Characteristical features:

Appearance:	Powder
Colour:	Yellowish
pH:	3,5 – 4,5
Solids:	80-85
Charge:	Anionic

4. Properties:

For general use, but considering that this product will provide some vegetal features to the final product. It provides flexibility to leather, as well as a good dyeing suitability because of its clear colour. Given the sensivity of vegetal extracts to iron salts, the product's recipe contains agents to counteract this matter.

5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +2°C to +35°C. Sealed containers have a service life of 12 months.

6. Application:

We recommend its use mainly in the retanning pack, either in quantities between 6 and 9% if added solely, or between 2 and 4% if added in combination with other retanning agents.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
