

1. Description:

Auxiliary product for leather finishing.

2. Presentation:

RA-1295 is a multi-purpose binding agent used for all kinds of items finishing: shoemaking, leathergoods, clothing and upholstery.

3. Composition:

Acrylic co-polymer in a water emulsion.

Appearance:	Liquid.
Nature:	Anionic.
Solids content:	40%±1
pH value:	2,5-3,5
Colour:	Milky.

4. Properties:

RA-1295 is a small particle dispersion, weakly acid and thickable by using ammonia. It provides with a high solidity level. Good resistance against solvents. Good light fastness. It forms a relatively soft film, a little bit sticky and very elastic. It provides the finishing with a good fullness, a great covering ability and a good flexometry.

5. Minimum storage capacity:

The product can be stored in its well closed container in a well ventilated place at temperatures between +2° and +30°C. In its sealed container it lasts 12 months.

6. Application:

RA-1295 is a binding agent which is used for the grounds of any type of finishing. It is also used for corrected grain impregnation procedures and as a resin to stick laminates/sheets to the skin.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
