

1. Introduction:

AX-0207 is a product that improves the penetration of finishing products in general and resins de impregnation.

2. Description:

Hydroalcoholic surfactant emulsion.

3. Composition:

Appearance:	Transparent liquid.
Active matter:	Approx. 31 %
Color:	Colorless.

4. Properties:

AX-0207 is a high efficiency universal penetrating agent. It can be used to improve the anchorage of finishes on leathers with low absorption, for spray dyeing and for impregnating corrected grain or full grain leathers.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

The amount to be used must be previously tested since it depends on the nature of the leather and its absorption; it can vary between 40 and 100 gr./kg.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
