

Limeqin LA

1. Description:

Aqueous solution of nitrogenous compounds free of sulphide.

2. Chemical nature:

Aqueous solution of nitrogenous compounds free of sulphide.

3. Characteristical features:

Appearance:	Liquid.
Active matter:	55%±2%
pH:	approx. 10.5
Colour:	Colorless to slightly pinkish.

4. Properties:

Sulfur-free unhairing auxiliary. Improves hair extraction in a more ecological way than other usual auxiliaries. Reduces the swelling of the skins, obtaining them softer and cleaner. It allows unhairing products to penetrate through the skin more evenly as well as helps extract the epidermis and skin pigments more effectively. Prevents the creation of blind grain during lime. Neck wrinkles, folds and blood veins are less pronounced.

5. Storage capacity:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

The best results when adding to Limeqin LA are obtained by adding Limeqin LA early in the unhairing process. The amounts to be used depend on the type of raw material and the amount of bath. The proportions vary between 0.5% and 1.5% on the weight of the salted skin. In the case of dry skin, the recommended amounts range between 1.5% and 3.5%. Having no reducing effect, it is necessary to use a small amount of sodium sulfide (0.1%-0.5%) together with Limeqin LA before immunization as the most economical solution.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
