

1. Introduction:

CS-0837 is a non-thermoplastic binder that is highly suitable for glossy and/or polishable base coats and topcoats.

2. Description:

Wax emulsion.

3. Composition:

Appearance:	Liquid.
Character:	Anionic.
Solid content:	16.5%
pH value (1:10):	9,5
Colour:	Beige.

4. Properties:

CS-0837 dries to a semi-opaque, light-colored, soft, glossy, non- thermoplastic film.

In plate finishes, it improves extensibility and ease of engraving, strongly prevents stickiness and thermoplasticity, and increases resistance to organic solvents. It has a good filling power.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well- ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

This product is extraordinarily suitable as a finisher and for basecoats in polishable finishes, providing great elasticity and a high, clear shine.

It is also used in conventional pigmented, aniline or semi-aniline finishes, finished with an iron.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
