

1. Introduction:

Oil and wax mixture.

2. Description:

Oil and wax mixture.

3. Composition:

Appearance:	Liquid.
Active matter:	100% approx.
Color:	Whitish.
Solubility:	Insoluble in water.

4. Properties:

This product can be used to achieve "pull-up" effects on water-repellent skins without impairing the skin's water resistance. It does not have organic solvents. In some cases it can even improve said resistance to water when using it.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

The product must be shaken before use and heated between 40 and 60°C before its application. A process that helps to achieve a greater effect of "Pull-up" is to warm the skin before applying the product.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
