

1. Introduction:

AC-0180 is a finishing auxiliary that gives the leather surface a greasy feel and a strong darkening

2. Description:

AC-0180 is a finishing auxiliary that gives the leather surface a greasy feel and a strong darkening

3. Composition:

Product composed of natural oils and modified fats.

4. Properties:

AC-0180 is a slightly cloudy, yellowish viscous liquid and will not mix with water. AC-0180 is soluble in various organic solvents, and can be easily mixed with pull-up waxes, such as eg. ex. our wax CW-0468.

With AC-0180 you can get finished leathers with a greasy surface touch and a strong darkening effect. The product also gives a surface with water repellency.

5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

6. Application:

The product is applied directly to roll-coating, or in combination with pull-up waxes or other oils.

7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
