

## 1. Introduction:

Water-repellent fattening product.

## 2. Description:

Silicone emulsion with special additives.

## 3. Composition:

Appearance:	White emulsion.
Solid content:	40% ± 2
pH (10%):	6.0 ± 0.5

## 4. Properties:

Water-repellent fatliquor for all types of water-repellent articles whose properties must be measured by the Maeser Test, getting very low water absorption values. It has very good fastness to light and heat

## 5. Minimum storage capability:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature ranging from +5°C to +35°C. Sealed containers have a service life of 6 months.

## 6. Application:

It is used alone or in combination with our WP QIN O. It is usually used in amounts ranging between 4 and 6% on the weight of the shaved skin. It is also advisable to add a part of the product 20 minutes before adding the metal salt in order to improve the hydrophobic capacity of the skin.

## 7. Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

## 8. Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
